PROFILE

I am passionate about software engineering and constantly seek out new concepts and ideas to learn my goal is to expand my skills and contribute positively to your company. I am confident that i can make a valuable impact and i am excited to work with you.

PERSONAL PROJECTS

HOTEL MANAGEMENT SYSTEM
Semester Project

Created a Hotel Management System using HTML, CSS, JavaScript, Php and MySQL, where Users enables to Register then Book rooms, & manage room bookings, user accounts, and hotel reviews while providing administrators with tools to manage user data and hotel-related operations effectively.

BLOOD-DONATION SYSTEM
6 Months Course Final Project

Created a Blood Donation System using HTML, CSS, JavaScript, and MySQL, where donors register their details, and recipients can view donor information and contact them directly via phone. The system streamlines the blood donation process through easy donor-recipient connection.

H_Royal_Shop – Product Showcase Website
Django, HTML, CSS, Bootstrap, Sqlite

Developed an eCommerce-style product showcase website using Django. Implemented dynamic product listings using models and templates, utilized Django's admin interface for content management, and created a clean, responsive UI with a hero section, navigation bar, and product cards.

Ongoing Learning – Django (Python) Projects

Currently learning Django (Python) and building multiple basic projects to strengthen understanding of MVC architecture, URL routing, views, models, and database integration for dynamic web applications.

EXPERIENCES

Web Development Internship - (3 Months - 2024)

Selected as a Frontend Development Remote Intern at Digital Empowerment Pakistan (DEP), where I'm building responsive landing pages, personal portfolio sites, and other modern web interfaces using React.js, Boostrap, TailwindCSS, and JavaScript. The internship is enhancing my frontend development skills through real-world projects and collaborative team experience.

CERTIFICATION
